DAVID ABIOLA SHODEINDE

BACKEND ENGINEER | PYTHON | DJANGO | DJANGO REST FRAMEWORK | FASTAPI

Lagos, Nigeria | +234 704 548 9883 | abiolad267@gmail.com LinkedIn: linkedin.com/in/abiola-david-2b5319252 | GitHub: github.com/DaveTech683 | Portfolio: www.techdv.vercel.app

PROFESSIONAL SUMMARY

Backend Engineer with 4+ years of experience specializing in Python, Django, DRF, and FastAPI. Skilled in building scalable backend systems, RESTful APIs, database architectures, and cloud-hosted applications. Experienced in team leadership, API development, authentication, third-party integrations, and cloud deployment, with a strong focus on performance, reliability, and maintainable software.

CORE COMPETENCIES

Programming Languages: Python, SQL, JavaScript
Backend Frameworks: Django, Django REST Framework, FastAPI, Pydantic
API Development: RESTful API Design, API Integration, Authentication, Authorization, Webhooks, OpenAPI/Swagger Documentation
Databases: PostgreSQL, MySQL, Database Schema Design, Database Migrations, Query Optimization
Cloud & Infrastructure: AWS, Cloudflare, Railway, Supabase, Application Deployment, Cloud Infrastructure Management
Engineering Practices: Clean Architecture, Git, CI/CD, Application Maintenance, Monitoring, Deployment
Frontend Collaboration: React Native, Expo, Next.js, HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

Lead Backend Developer | ECURMAS Remote, Feb 2025 - Jan 2026

- Led a team of four developers working across different programming languages, coordinating technical contributions and integration into a unified software platform.
- Developed backend functionality for an e-commerce infrastructure platform providing reusable e-commerce APIs, enabling businesses and developers to build online stores without creating backend systems from scratch.
- Implemented backend features within an existing product architecture, translating product requirements and architectural specifications into functional server-side components.
- Contributed to backend system design, API development, database integration, and application functionality supporting core e-commerce operations.
- Coordinated development activities, tracked implementation progress, and supported integration across the engineering team.

Technical Stack: Python, FastAPI, PostgreSQL, RESTful APIs, Git. Didn’t get to cloud before I Exited

FULL STACK DEVELOPER | MODESTDAILYFASHION

Lagos, Nigeria | March, 2024 - July 2026

- Designed and implemented the application architecture for an e-commerce website, establishing a structured foundation for maintainability, functionality, and future expansion.
- Developed the website end to end using Django, HTML, CSS, and JavaScript, implementing customer-facing functionality and server-side application logic.
- Designed and managed the MySQL database structure for product information, customer records, and order management.
- Developed user-facing features supporting product browsing, product discovery, and the online shopping experience.
- Maintained and improved the application after deployment, implementing updates and resolving issues to support continued functionality.

Technical Stack: Python, Django, MySQL, Next.js

OPERATIONS TEAM MEMBER | KESKESE LTD – NYSC

Lagos, Nigeria | March 2026 – Present

- Coordinated project schedules, implementation timelines, and operational dependencies to support effective project delivery.
- Prepared and consolidated project reports, maintaining accurate records and communicating progress to relevant stakeholders.

SELECTED PROJECTS

GoPremiere | co-founder & Lead Backend Developer

Independent Project | 2025 – Present

- Developing a gospel movie streaming platform with a React Native mobile application and FastAPI backend, supporting content discovery, user management, and streaming-related functionality.
- Designing backend services, database structures, and RESTful APIs to support communication between the mobile application and server-side infrastructure.
- Working on cloud deployment and video delivery infrastructure, using Railway for backend hosting and Cloudflare Stream for video content delivery.

Technical Stack: Python, FastAPI, Pydantic, React Native, PostgreSQL, Railway, Cloudflare Stream, Git

Smart Attendance System | Developer

Academic Project | 2020 – 2023

- Developed a contactless attendance management system using Python, integrating smart card technology with an ACR card reader for attendance identification and data capture.
- Implemented application logic for processing attendance information and supporting interaction between the card reader and software interface.
- Integrated hardware components with software functionality to provide a streamlined attendance-recording process.

Technical Stack: Python, Smart Card Technology, ACR Card Reader, MySQL
