DAVID ABIOLA SHODEINDE

BACKEND DEVELOPER

Lagos, Nigeria | +234 704 548 9883 | abiolad267@gmail.com | www.linkedin.com/in/abiola-david-2b5319252 | www.github.com/DaveTech683

PROFESSIONAL SUMMARY

Backend developer with 4 years of experience designing, building, and deploying production server-side applications. I specialize in Python, with deep working knowledge of Django and FastAPI, and I'm comfortable owning a system end to end, from database schema and API design to cloud deployment. I build secure, well-documented APIs and scalable cloud infrastructure, and I work closely with mobile and web teams so the backend fits the product it serves.

CORE COMPETENCIES

Languages & Frameworks: Python, Django, Django REST Framework, FastAPI, Pydantic, SQL
Cloud & Infrastructure: AWS, Cloudflare, Railway, Supabase
APIs & Integration: RESTful API design and development, third-party API integration, authentication and authorization, webhooks
Databases: PostgreSQL, schema design, migrations, query optimization
Practices: Clean architecture, API documentation (OpenAPI/Swagger), Git, CI/CD, deployment and monitoring
Complementary: React Native/Expo, Next.js (for full-stack collaboration and delivery)

PROFESSIONAL EXPERIENCE

OPERATIONS TEAM

Lagos, Nigeria
March, 2026 - Dec 2026

KESKESE LIMITED | NYSC

- Developed and maintained timelines for company projects and brand activations, setting out milestones, deadlines, responsibilities, and dependencies so that every team knew what was due and when.
- Monitored and supervised activations from planning through execution, making sure delivery matched the brief and schedule, resolving issues as they came up, and reporting progress back to the team.
- Collected and consolidated data from every project and activation into clear, organized reports, giving the company the information it needed to make informed business decisions.
- Designed high-quality marketing and presentation graphics using Canva and AI design tools, achieving about 70% accuracy to the brief on the first output.
- Designed and produced the company profile, presenting the business, its services, and its work in a clean, professional format.

BACKEND TEAM LEAD
ECURMAS

Remote
Feb 2025 - Dec 2025

- Led a team of four developers, each specializing in a different programming language, and coordinated their work so that it came together as one unified system.
- Built the system on top of an existing architecture provided by the product manager, working within its design and requirements while delivering the backend functionality it called for.
- Developed a platform that gives users access to e-commerce endpoints they can build on, much like WordPress, so they can create their own online stores without building the underlying backend from scratch.

FULL STACK DEVELOPER
MODESTDAILYFASHION

Lagos, Nigeria
March, 2024 - July 2026

- Designed and implemented a well-structured architecture for the company's e-commerce website, organizing the application so it was easy to maintain, extend, and scale as the business grew.
- Built the website end to end using HTML, CSS, JavaScript, and Django, covering both the customer-facing pages and the server-side logic.
- Designed and developed the MySQL database that stores the store's data, including products, customers, and orders.
- Created a clean, user-friendly interface that lets customers browse, find products, and complete purchases with ease.
- Maintained and upgraded the website after launch as an added service, keeping it reliable and up to date with new improvements.

SELECTED PROJECTS

GoPremiere, Founder & Lead Developer (Underdevelopment) | 2025 - Present

- A gospel movie mobile app using React native for the frontend and FastAPI as the backend

Smart Attendance System, Developer (School Project) | 2020 - 2023

- Contactless attendance system using smart cards, with an ACR card reader as the hardware and Python for the interface and backend.

Child Abuse Tracking System, Developer | 2024

- Python-based system for tracking child abuse

EDUCATION

HND in Computer Science
Moshood Abiola Polytechnic (MAPOLY)

Ogun, Nigeria
2019 - 2023

LANGUAGES

English (Fluent) | Yoruba (Fluent)
